

Trend: Nonemployer Statistics is an annual series with data for businesses that have no paid employees and are subject to federal income tax. Most nonemployers are self-employed individuals operating as sole proprietorships, including solo entrepreneurs, which may or may not be the owner's principal source of income. The majority of all business establishments in the U.S. are nonemployers but due to their small economic impact, these firms are excluded from most other Census Bureau business statistics.
