

Accelerate AI

4-Week Program Path

★ Kickoff Event

Attend the Accelerate AI launch on October 6th, see the four solutions in action, and choose the one that fits your business.

1 Problem Definition

A Nub8 engineer works with you to map your challenge, document your current process, and define what success looks like.

2 Implementation

Your solution is built on AWS infrastructure, configured to your business, and connected to your existing data and workflows.

3 Testing & Improvement

You test the solution with real scenarios, give feedback, and Nub8 refines it until it works exactly the way your business needs it to.

4 Training & Handoff

Your team is trained, full documentation is delivered, and your solution goes live. **You own it from day one.**
