Age Group by Race

Demographics Population: Components of Change

Trend: The components of population change in Leon County during 2000-2010 changed considerably in comparison with 1990-2000. The percentage of Leon County's population growth associated with net migration dropped from 67.1% in 2000 to 56.1% in 2010. Between the 2010 Census and 2020 Census, an estimated 71.7% of Leon County's population growth was attributable to net natural increase (total births less total deaths). Since 2020, an estimated 85% of the population increase for Leon County was from net migration.

	Leon County	Tallahassee MSA	State of Florida
Total Population Change (2020-2024)	9,999	15,732	1,476,364
Net Natural Increase	1,515	489	-96,983
Births	11,182	14,945	871,644

Employment

State Government Employees in Tallahassee MSA

Trend: The proportion of State government employment (e.g., State of Florida, FSU, FAMU, TSC) to total employment for the Tallahassee MSA has steadily declined over the past three decades: 29.7% in the 1990s, 26.9% in the 2000s, and 25.5% in the 2010s. Since 1990, annual average State employment has only fluctuated between 39,300 and 46,200, with a median value of 44,500. In 2024, the annual average was 46,200. Employment growth has come mostly from the private sector, so the proportion of State jobs to total employment for the Tallahassee metro area has steadily declined over the past 30 years.

Fastest Growing Industries, 2024-2032

Per Capita Personal Income

Trend: Per capita personal income increased 7.1% in Leon County in 2023 and was 83% of the per capita income for the state. Since per capita personal income is calculated as the personal income of a given area divided by the resident population of the area, per capita personal income tends to be lower in Leon County and the Tallahassee MSA due to the large number of college students residing in our community.

Graduate Retention

Recent Graduates Employed in Leon County by the next Fall

Trend: "Graduate Retention" is not easy to define. Higher education enrollment is driven by State, national, and international recruitment rather than by local labor market needs. The number of graduates and the skills they graduate with may not necessarily match the needs of Tallahassee's labor market. In the 2022/23 academic year, 15,141 graduates completed degrees at FSU and FAMU. Graduate retention was 14.6%, with 11.2% full-time employed in Leon County by Fall 2023. The 11.2% of graduates found full-time employed in Leon County the following year is similar to the proportion of incoming university students from Leon County (10.6%). This retention equilibrium for Leon County generates continuous renewal of the local workforce and is consistent with the tempo of growth in the local labor force and employment.

ECONOMIC VITALITY CONOMIC VITALITY CONOMIC Tallahassee MSA

Trend: Job creation and job destruction are necessary for a dynamic, growing economy. Job Creation is the sum of all employment gains from expanding establishments from one year to the next including establishment startups. Job Destruction is the sum of all employment losses from contracting establishments from one year to the next including establishments shutting down. The net employment change equals the job creation minus job destruction. Trend lines use Hodrick-Prescott (HP) filter as a data-smoothing technique to remove short-term fluctuations and display long-term trends.

* Entry Wage - This is the wage an entry-level worker might expect to make. It is defined as the average (mean) wage earned by the lowest third of all workers in a given occupation.

** Experienced Wage - This wage represents what an experienced worker might expect to make. It is defined as the average (mean) wage earned by the upper two-thirds of all workers in a given occupation.

Italics indicate annual wage.

BEA conducts comprehensive updates at about 5-year intervals that incorporate major periodic source data, as well as improvements in concepts and methods.

ECONOMIC VITALITY

Real GDP per Private Sector Employee, Tallahassee MSA

Trend: The broadest proxy for Productivity in metropolitan areas is to measure the Gross Domestic Product (GDP) of private industries per private sector employee. GDP per employee is calculated by dividing GDP by total employment, in inflation-adjusted (chained 2017) dollars. Annual changes in productivity for the Tallahassee metro area have fluctuated between a low of -3.7% between 2012 and 2013 to a high of 5.4% from 2001 to 2002.

Year	Private Industries Real GDP (\$ millions)	Avg. Monthly Private Employment	Productivity (Private Real GDP per Private Sector Employee)	Productivity Change from Prior Year

Economic Factors Taxable Sales:

Annual Taxable Sales, Change from Previous Year (\$ millions)

Trend: Taxable sales data for various Metropolitan Statistical Areas (MSAs) are popularly used as one indicator of regional economic activity. These data are derived from sales tax returns remitted to the state Department of Revenue each month. Taxable sales are those sales subject to Chapter 212, Florida Statutes. Sales tax is levied generally on sales of goods, but not services, although there are some taxable services. The overall level of taxable sales increased 2.4% in the Tallahassee MSA in 2024. Taxable sales for the State of Florida were up 1.5% in 2024 compared with 2023.

Annual Change in Consumer Price Index

The Consumer Price Index for all Urban Consumers (cost of living) in 2024 was 2.9%, down from 4.1% in 2023.

Economic Factors C2ER Annual Cost of Living Index

Trend: In 2024, the Tallahassee urban area captured an overall composite index of 93.0, or 7% below the average cost of living for all participating urban areas.

The Annual Cost of Living Index (COLI) is released by the Council for Community and Economic Research (C2ER) to measure regional differences in the cost of consumer goods and services (like grocery items, healthcare, and housing), excluding taxes and non-consumer expenditures, for professional and managerial households in the top 20% of income. The index is based on more than 90,000 prices covering 60 different items for which prices are collected three times a year. This research tool allows OEV to make accurate cost of living comparisons between Tallahassee-Leon County and any of the 254 other participating urban areas across the United States.

Economic Factors Florida Price Level Index

Trend: The Florida Price Level Index (FPLI) was established by the Legislature as the basis for the District Cost Differential (DCD) in the Florida Education Finance Program. It represents the costs of hiring comparable personnel across school districts. Extensive data on wages is used to estimate the relative cost of hiring comparable workers among Florida's 67 counties in a given year. The median Floridian, ranked by 2024 county FPLI, lives in Duval County, with an index value of 101. That is, less than half of Floridians live in counties with index values greater than 101, less than half live in counties with index values less than 101, and the rest live in Duval County. Note: this is a cross-sectional measure that compares the relative wage levels among Florida's 67 counties and is not designed to measure inflation from one year to the next.

Year	Leon County	Gadsden County	Jefferson County	Wakulla County

Tallahassee-Leon County Office of Economic Vitality

Trend: Regional Price Parities (RPPs) are regional price levels expressed as a percentage of the overall national price level for a given year. The price levels are determined by the average prices paid by consumers for the mix of goods and services consumed in each region. Taking the ratio of RPPs shows the difference in price levels across regions. All I tems: all the detailed consumption goods and services used to estimate the RPPs. Goods: durable and nondurable consumption goods used to estimate RPPs, including apparel, education, food, housing, medical, recreation, transportation, and other goods. Housing: The ratios of monthly tenant rents to owner-equivalent rents in the CPI housing file are estimated for several types of housing units, from studio apartments to detached houses with three or more bedrooms. The components of these ratios, that is, tenant rents and owner equivalent rents for each housing type, are the weighted geometric means of all the observations in the CPI. Other: consumption products used to estimate RPPs, including education, food, housing, medical, recreation, transportation, and other services.

ECONOMIC Economic Factors VITALITY Control Quantity Indexes for Real GDP

Trend: Total Quantity Indexes for Real GDP includes all Private Industries and Government. A chained-type index is based on the linking (chaining) of indexes to create a time series. These annual chained-type indices are used **in BEA's national income and product accounts and calculated using the weights of adjacent years. Those** annual changes are then multiplied (chained) together, forming the chained-type index time series. Chain-type indexes or chain-dollar estimates are used to show how output or spending changes over time.

Note: Data for 2001 to 2023 indexed to 2017 = 100.

Graduation Rate at Public Schools

Education

Public Schools:

School Grades

Trend: Between 2022 and 2024, nearly half of all public schools in Leon County earned a grade of A or B. The 2022-2023 school and district grades incorporate results from new performance standards that serve as an informational baseline. Pursuant to FDOE Emergency Order No. 2021-EO-02, only schools for which an opt-in request was submitted by the school district superintendent or charter school governing board had a letter grade assigned for the 2020-2021 school year. The Florida Department of Education did not calculate K-12 school grades for the 2019-2020 school year due to effects of COVID-19 quarantine on reporting.

Public Schools:

School Grades

Trend: Between 2022 and 2024, nearly half of all public schools in Leon County earned a grade of A or B. The 2022-2023 school and district grades incorporate results from new performance standards that serve as an informational baseline. Pursuant to FDOE Emergency Order No. 2021-EO-02, only schools for which an opt-in request was submitted by the school district superintendent or charter school governing board had a letter grade assigned for the 2020-2021 school year. The Florida Department of Education did not calculate K-12 school grades for the 2019-2020 school year due to effects of COVID-19 quarantine on reporting.

Community and Environment Property Tax Rate 2024 Millage Rates

Trend: Since 1919 the City of Tallahassee has operated under a Commission-Manager form of government. The Mayor and four Commissioners are elected at-large for staggered four-year terms with elections for two commission seats being held every other year. The City Commission appoints four officers to administer the duties of the city: City Manager, City Treasurer-Clerk, City Auditor, and City Attorney. The County is guided by an elected seven-member Board of County Commissioners, five of whom are elected to serve specific commission districts and two members are elected at-large. Each Commissioner is elected to a four-year term with the position of Chairperson selected annually on a rotating basis. The County Administrator is appointed by the Board to oversee all functions, directives and policies. The County Administrator administers all county offices not governed by elected County officials. Elected County officials include the Sheriff, Property Appraiser, Clerk of the Court, Supervisor of Elections, and Tax Collector.

Community and Environment

Climate

Trend: Tallahassee has a mild, moist climate characteristic of the Gulf States, experiencing a subtropical summer similar to the rest of Florida. In contrast to the Florida peninsula, Northwest Florida of which Tallahassee is a part, experiences four seasons. Prevailing winds average 5.5 miles per hour and are from a southerly direction in the spring and summer, then shift toward a more northerly direction later in the year. Tallahassee has clear skies on average 102 days per year; partly cloudy skies, 129 days; and cloudy skies, 134 days.

Residential and Commercial Development Residential Development:

Housing Units Authorized by Building Permits in Tallahassee MSA

Trend: The overall level of residential building permits for new construction authorized in the Tallahassee MSA is increasing since the precipitous decline during the 2007-2009 recession. During the 1990s, there were an average of 2,198 housing units authorized by permits each year. The annual average increased in the 2000s to 2,518 per year, including the 3,918 units authorized in the peak year of 2005. The annual average in the 2010s was 1,338, or 53% of the average during the 2000s and 61% of the annual average of the 1990s. The average so far in the 2020s is 2,611, nearly double the annual average of the 2010s.

Note: Annual totals derived from seasonally-adjusted monthly totals.

Economic Factors

Innovation:

Nonemployer Statistics

Trend: Nonemployer Statistics is an annual series with data for businesses that have no paid employees and are subject to federal income tax. Most nonemployers are self-employed individuals operating as sole proprietorships, including sole entrepreneurs, which may or may not be the owner's principal source of income. The majority of all business establishments in the U.S. are nonemployers but due to their small economic impact, these firms are excluded from most other Census Bureau business statistics. Since 2020, the number of nonemployer establishments in the Tallahassee metro area has increased by 9% and total receipts have grown by 15%.

Year	Leon County Nonemployer Establishments	Leon County Receipts (\$ millions)	Tallahassee MSA Nonemployer Establishments	Tallahassee MSA Receipts (\$ millions)

Nonemployer Establishments, 2004-2023

Economic Factors

Innovation:

Nonemployer Statistics

Trend: Nonemployer Statistics is an annual series with data for businesses that have no paid employees and are subject to federal income tax. Most nonemployers are self-employed individuals operating as sole proprietorships, including solo entrepreneurs, which may or may not be the owner's principal source of income. The majority of all business establishments in the U.S. are nonemployers but due to their small economic impact, these firms are excluded from most other Census Bureau business statistics. Since 2020, the number of nonemployer establishments in the Tallahassee metro area has increased by 9% and total receipts have grown by 15%.

Innovation: **SBIR/STTR Grants**

Trend: Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) are federal programs encouraging domestic small businesses to engage in research and development with potential for commercialization. Through competitive awards, SBIR and STTR help small businesses explore their technological potential and give incentive to profit from commercialization. Since 2010, Leon County firms have been awarded over \$10 million, with 33% coming from the National Science Foundation and 33% from the Department of Defense.

Year	Award Amount
2010	\$149,994

Business Formations in Tallahassee MSA

Trend: Business Formation Statistics (BFS) complied by the US Census Bureau measure business initiation activity and the cycle from initiation to realized business formation. BFS data gives an early look at business formation activity by covering Employer Identification Number (EIN) applications, including those associated with starting a new employer business. Industry details are unavailable at the county level. Leon County typically accounts for around 80% of business formation in the Tallahassee metro area. During 2005 to 2015, business formations in the Tallahassee metro area averaged 3,900 per year. Since 2015, the average has been around 6,500 per year. In 2024, business applications in the Tallahassee metro area totaled 6,708, down 8.6% from 7,338 in 2023.
